SKILLS

ASP.Net

MS SQL Server

Web API

Entity Framework

C#

VB.Net

Python

OOP

Azure Cloud

Blazor

Svelte

jQuery

Bootstrap

Tailwind CSS

PROFILE

Ever since making the decision to enter into software, the passion for problem-solving and (what a past professor of mine would say) having the necessary intestinal fortitude to find a solution is what has driven me. My professional software engineering experience consists mainly of Microsoft technologies (C#/ASP.NET/SQL Server/Azure), in addition to Javascript and Python.

EMPLOYMENT HISTORY

Software Developer at ProspectsPLUS!, Bradenton, FL

July 2021 — Present

I develop ASP.NET MVC and Web Form web-to-print postcard marketing e-commerce platforms and RESTful Web API services while maintaining our MS SQL Server databases and back-end systems with Entity Framework. My day-to-day consists of updating/debugging the server-side and back-end systems as needed in addition to working on or building new revenue-generating projects we have in our backlog. Front-end development consists of Blazor, Svelte, jQuery, and Bootstrap. I primarily write in C#, VB.NET, Python, and JavaScript.

EDUCATION

The Tech Academy, Portland, OR

July 2019 — July 2020

Built a strong foundation in computer science and gained knowledge of multiple programming paradigms and technologies I needed to begin my engineering career. After graduating, I now possess the skills to properly assess, diagnose, and find solutions as a developer.

INTERSHIPS

Software Developer at Prosper IT Consulting, Portland, OR

July 2020 — April 2021

This internship was my first opportunity to get my hands on real-world live projects within a company. I got exposure to daily scrum meetings with an agile team and an enterprise-level code base. I was able to work on multiple ASP.NET Core web applications, getting experience managing and manipulating data that was extremely helpful in getting my career off the ground.
